Experience

MediCloud Global Private Limited — 03/2026 – Present

Frontend Developer

- Contribute to **2 production-grade web applications**: a healthcare e-commerce platform with end-to-end shopping and payment workflows, and a doctor appointment-booking platform supporting doctor discovery, search results, scheduling, patient profiles, authentication, and payments.
- Integrate RESTful APIs across product discovery, cart management, checkout, and appointment booking to enable dynamic data rendering and seamless user interactions.
- Develop and maintain reusable React components and contribute to **20+ API-driven workflows**, ensuring component reusability and consistent user experiences.
- Investigate and resolve **production-level frontend and API issues** in collaboration with backend engineers, debugging request/response failures, authentication problems, and distributed-service integration issues to maintain critical workflows.
- Engineered **responsive, interactive user interfaces** using React.js, JavaScript, TypeScript and Tailwind, incorporating animations, custom graphics, and **3D visual elements**.
- Contribute to an **admin/CRM service** by developing and enhancing administrative interfaces and internal business workflows.

Rixi Labs — 10/2025 – 12/2025

Web Developer Intern

- Developed a **fitness management application** with React Router, reusable UI components, membership workflows, authentication screens, contact pages, and responsive navigation.
- Implemented REST API-driven member management using Axios and Fetch, supporting member registration, data retrieval, editing, deletion, and dynamic form state handling.
- Built interactive **CRUD workflows with controlled forms, loading states, conditional rendering, and client-side validation patterns**, connecting frontend actions with backend services.

NTS Nihon Global — 06/2025 – 09/2025

Frontend Developer Intern

- Developed **responsive React.js interfaces across e-commerce library pages**, translating Figma designs into consistent, pixel-accurate user experiences.
- Integrated **REST APIs** across frontend modules, handling API responses and dynamically rendering backend-driven data throughout the application.
- Performed **frontend debugging and defect resolution**, collaborating with backend engineers to investigate API issues, clarify application flows, and ensure reliable feature integration.

Technical Skills

- **Languages:** JavaScript, TypeScript, HTML5, CSS3, Golang
- **Frontend Engineering:** React, Next.js, React-Native, Component Designs
- **Styling and Animations:** Tailwind CSS, Bootstrap, GSAP, Framer Motion,
- **Tools:** Git, GitHub, Docker, Postman, VS Code, JIRA, IntelliJ IDEA
- **Concepts:** REST APIs, Responsive Design, SPA Architecture, Component-Based Architecture, UI Optimization

Projects

Stellar Precision | *React.js, Vite, React Router DOM, CSS* — **Live Demo** | **GitHub**

- Developed a **responsive scientific-instrument catalog** featuring categorized product listings, product details, pricing, ratings, and stock-status indicators using React.js.
- Implemented **6+ client-side routes** with React Router DOM and built reusable product components, quick-view modals, and centralized cart state using React Context and useReducer.
- Optimized product browsing through **lazy-loaded images, scroll-triggered animations, and animated counters**, while implementing cart state management for real-time quantity updates, item removal, and accurate total calculations.

Gym Website (GymTech) | *React.js, Tailwind CSS, Bootstrap* — **Live Demo** | **GitHub**

- Engineered a **responsive gym membership platform** featuring fitness programs, membership plans, and user registration.
- Integrated **REST APIs using Axios and Fetch** to implement CRUD operations for efficient member management.
- Developed reusable UI components and interactive forms using **React, Styled Components, React Router, and React Scroll** to enhance responsiveness and navigation.

Education

Rama University, Kanpur — 05/2022 – 05/2026

Bachelor of Technology, Computer Science & Engineering — *CGPA - 8.5/10*
