Experience

MediCloud Global Private Limited

03/2025 – Present

Frontend Developer

- Engineered and maintained a production-level **healthcare e-commerce platform** using **React.js, JavaScript, CSS Docker**.
- Developed scalable **API-driven workflows** for authentication, cart, checkout, wishlist, orders, and SEO optimization, improving application responsiveness and user interaction.
- Integrated frontend with **microservices architecture**, performed API testing/debugging, and optimized performance across **mobile, tablet, and desktop** devices.
- Built **reusable UI components** and collaborated with backend teams to deliver scalable, production-ready frontend solutions.

NTS Nihon Global

06/2025 – 08/2025

Frontend Developer Intern

- Developed responsive and API-integrated **UI components** for **NTS Library** using **React.js, Bootstrap, and Tailwind CSS**.
- Improved **frontend performance, usability, and scalable UI architecture** through collaboration with cross-functional teams.
- Implemented reusable frontend components and enhanced application responsiveness for improved user experience.
- Collaborated in an **Agile development environment**, participating in requirement discussions, UI enhancements, and delivering maintainable frontend solutions aligned with business needs.

Rixi Labs

08/2025 – 09/2025

Web Developer Intern

- Built responsive and user-friendly interfaces using **React.js, Bootstrap, and Tailwind CSS**.
- Performed **testing, debugging, and UI optimization** to ensure smooth cross-device functionality and accessibility.
- Worked on improving frontend responsiveness and consistent UI behavior across multiple screen sizes.
- Applied **frontend development best practices** and component-based design principles to build scalable, maintainable, and user-centric web interfaces.

Projects

Stellar Precision | *React.js, Vite, React Router DOM, CSS*

Live Demo | GitHub

- Developed a professional website for a scientific instruments company to showcase products, services, and business information.
- Designed intuitive page layouts and navigation to improve user engagement, content accessibility, and overall browsing experience.
- Optimized responsiveness and performance to ensure a seamless experience across desktop, tablet, and mobile devices.

Gym Website (GymTech) | *React.js, Tailwind CSS, Bootstrap*

Live Demo | GitHub

- Built a gym management platform enabling users to explore membership plans, register online, and book trainer appointments.
- Developed interactive user interfaces and integrated dynamic registration functionality to enhance user engagement and usability.
- Ensured responsive design and smooth performance across mobile, tablet, and desktop devices for a consistent user experience.

After-You | *React.js, Vite, React Router, Tailwind CSS*

Live Demo | GitHub

- Developed a **women-centric wellness platform** featuring emotional support resources, self-care services, community storytelling, and AI-assisted interaction.
- Implemented **authentication workflows, interactive modules, client-side routing, and reusable components** to deliver a seamless Single Page Application experience.
- Designed responsive and engaging user interfaces with **animations, glassmorphism UI, local storage persistence, and accessibility-focused frontend architecture**.

Skills

- **Frontend:** React.js, JavaScript (ES6+), Next.js, TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap
- **Tools:** Git, GitHub, Docker, Postman, VS Code, JIRA, IntelliJ IDEA
- **Concepts:** REST APIs, Responsive Design, SPA Architecture, Component-Based Architecture, UI Optimization

Education

Rama University, Kanpur

05/2022 – 05/2026

Bachelor of Technology, Computer Science & Engineering

Key Achievements

- Secured **1st Rank** in **CodeFiesta** and Code-Kabila, demonstrating strong problem-solving and programming skills.
- Built and deployed **5+ production-ready web applications** using modern frontend technologies.
